

Tyson Foods: A Global Food Company

With operations in 16 countries serving consumers and customers on five continents, our growing international presence allows us to deliver locally relevant innovation anywhere.

Overview

With today's global economy, growing international markets and an increasing demand for safe, high-quality food, Tyson Foods made it a strategic priority to expand our business outside the United States. As one of the world's largest protein processors and marketers, we have brought the best practices from our U.S. operations to our international locations and believe we are well-positioned to manage our in-country international operations with actions and programs that:

- Provide safe, high-quality food to our customers and consumers
- Create business and industry value
- Benefit our team members and local communities
- Build collaborative partnerships focused on responsible and sustainable business

We meet needs globally as **OneTyson.**

Being a global protein leader doesn't just mean that we operate in more than one country. We operate with a flexible, international supply chain that allows us to meet demand, on demand, in nearly any market.

HERE'S WHERE YOU'LL FIND US.

Demand for protein is global. We are, too.

The world's population is projected to reach 10 billion people by 2050 – and between now and then, global demand for protein is expected to double. Through our growing international footprint, we're pursuing every option to ensure customers and consumers have access to more – and more kinds – of protein, wherever they live.

Think globally. Innovate locally.

Companies may be global – but wherever you go, tastes and preferences are local, cultural, and unique. With international Innovation Centers placed across six countries, we're positioned to sustainably feed the world while delivering our consumers the flavors they crave.
